

Economics Program Learning Outcomes: I=Introductory, D=Develop, M=Mastery	1. Demonstrate an understanding of the role of organizations and institutions in a society, the impact of organizations and institutions on the economic environment and outcomes, and how incentives influence individual and organizational behavior and performance.	2. Recognize and describe how government actions affect economic performance and how economic interests influence government decisions.	3. Design and conduct research that will inform managerial and policy decision making, including the collection, analysis and interpretation of data using familiar software packages.	4. Define problems and identify multifaceted explanations for complex economic phenomena by using information and data from multiple sources to answer the questions at hand.	5. Demonstrate critical thinking about the information encountered, whether it is in coursework or reported in the media.	6. Communicate clearly and cogently in written and oral form using modern technology.
